

Hi there!

Thank you for your interest in this repaint pack. The MRCE BR189 is used widely in many different liveries. They are rented so change owner regularly which causes them to receive different liveries throughout their lifetime. The colors are always very hard to get right. The original Loco's all have slightly different wear and TS lighting conditions may give various results. With the help of some TS friends I think however that these versions come very close. These loco's use DTG's BR189 engine in the game.

To use these repaints you need to have installed:

- BR189 Pack 01 (RSC/DTG) <http://www.railsimulator.com/product/222662-Dispolok+BR+189+Loco+Add-On>

UNPACK the BR189Pack01.ap archive BEFORE installing the repaint. You can use any archiving program to do this (winzip, 7z etc.)

A special thank you to Marklin2 (railsim.nl) and Wouter Meems for the idea and cooperation in creating these repaints and Nick Saes for testing.

Content:

The package contains 6 versions of the BR189:

- BR189 189-103 European Gateway Services

- BR189 189-984 Locon

- BR189 189-997 MRCE Dispolok

All versions come in nd version too.

Install:

Although really nothing should go wrong; Make sure you have a backup of your Railworks directory just in case...

Unzip the .zip file to your PC. You will now have the following files available:

- **BR189_MRCE.rwp**
- **BR189_MRCE_Readme_English.pdf**

Install the .rwp file using utilities.exe located in your Railworks Main Folder.

Then navigate to: `..\railworks\Assets\PMdesign\BR189_MRCE\` and run ***BR189_MRCE_Install.bat***

This should complete the install. All repaints should now be available to you.

NOTE: If the install fails it is normally because the BR189Pack01 is unpacked in the wrong location. The installer asks you about the BR189 folder. Please check that before proceeding.

Locations that installer recognizes:

`..\railworks\Assets\RSC\BR189Pack01\RailVehicles\Electric\`

`..\railworks\Assets\RSC\BR189Pack01\BR189Pack01\RailVehicles\Electric\`

General:

Note: Make sure that you check the boxes in the editor for:

- RSC – BR189Pack01

Known issues:

- Auto numbering is not available
