

Hi there!

Thank you for your interest in this CP ES44AC repaint pack.

To use these repaints you need to have installed:

- DTG Canadian mountain passes route with CP ES44AC engine (<http://store.steampowered.com/app/222582>)

A special thank you to Thomas Johansson for the idea and testing.

Content:

The package contains 3 versions of the CP ES44AC:

- Slightly weathered

- Older type severely weathered

- Vancouver 2010 severely weathered

Install:

Although really nothing should go wrong; Make sure you have a backup of your Railworks directory just in case...

Unzip the .zip file to your PC. You will now have the following files available:

- **CP_ES44AC.rwp**
- **CPES44AC_Pack_Readme_English.pdf**

Install the .rwp file using utilities.exe located in your Railworks Main Folder.

Then navigate to: ..\Railworks\Assets\PMdesign\JL_CPES44AC\ and run **CPES44AC_Install.bat**.

This installer will copy DTG files from the default folder into your repaint folders.

This should complete the install. All 3 repaints should now be available to you.

Known issues:

- None

If you have questions please visit my website : www.mersel.nl (<http://www.mersel.nl/?p=1980>)

Or drop me an E-mail at : pmdesign@mersel.nl ([mailto:paul@creativeworx.nl?subject=Ref. CPES44AC Pack](mailto:paul@creativeworx.nl?subject=Ref.%20CPES44AC%20Pack))

Have fun!!!
