

Hi there!

Thank for your interest in my HKX repaint for RSC's ES64U2.

To use these repaints you need to have installed AND UNPACKED (.AP file):

- RSC's ES64U2 MRCE Taurus
(<http://www.railsimulator.com/product/222631-MRCE+ES+64+U2+%27Taurus%27+>)

After unpacking the ES64Pack01.ap file in the same location you will see a folder structure in ES64Pack01.

Contents

The zip file contains:

- RSC_ES64U2_HKX.rwp
- RSC_HKX_README.pdf

The package contains repaints for 2 versions of the Taurus:

- Siemens ES64U2 HKX

- Siemens ES64U2 HKX Weathered

Install:

Although really nothing should go wrong; Make sure you have a backup of your Railworksdirectory just in case...

After installing the .rwp package using the utilities.exe that is located in your railworks folder, go to the PMdesign directory

(..\railworks\Assets\PMdesign\ES64U2 HKX RSC). Then run the file : HKXTaurusRSC_Install.bat

This will copy the original RSC ES64U2.GeoPcDx files into the HKX folders.

You can also do this manually if you prefer.

This should complete the install. All repaints should be available to you.

If you have questions please visit my website : [www.mersel.nl \(http://www.mersel.nl/?p=1672\)](http://www.mersel.nl/?p=1672)

Or drop me an E-mail at : pmdesign@mersel.nl

Have fun!!!

Paul Mersel, PMdesign
