

QUICKSTART for Re 4/4 I Shuttle from TrainworX **– Scenarios for Gotthard Panorama Express from simtrain.ch**

Re 4/4 I – Commuter train of the SBB from the 50s of the last century

Please read the 2 documents before the first ride. Among other things, you will find information about the assembly of pendulum trains and the operation of the locomotive and control car.

Special key functions:

Commissioning of the locomotive Re 4/4 I and the control car BDt 4

After starting the scenario, the engine must first be started. This is possible either by operation in the cab with the mouse, or with a keyboard shortcut.

- First turn the key switch with the mouse, then individually push all the switches on the driver's desk forward
- Press CTRL + Shift + S to display the message in the upper right corner of the screen that is on

In a cab change the new cab must be restarted. Switching off the cab is only possible with the mouse.

Automatic vigilance device (SIFA)

Observe the notes on AVD in the manual for the locomotive.

AVD messages are not visible in the auxiliary driver's station / F4 as with other locomotives and can not be acknowledged at this point. AVD messages are indicated by a text message at the top right of the screen.

Acknowledgment of AVD is carried out by means of the "Space" key.
SIFA can be deactivated and activated with SHIFT + 7

Other functions:

Contrary to the usual key assignment, note the following changes:

Whistle	=	Key „B“
Lighting of the train:	=	Key „H“ for On, Shift+H for Off
- Click once	=	Top lighting white at the front, red at the back
- Second click	=	changes lighting for opposite direction

For further functions please refer to the manual !

Scenarios / Engine driver service at the Gotthard

If the Gotthard Panorama-Express is installed, you will find 4 scenarios under Drive / **STANDARD**:

- GPE_08 – Stroller on the mountain (Erstfeld to Göschenen)
- GPE_09 – Again downhill (Göschenen nach Erstfeld)
- GPE_10 – With the pendulum to the lake (Erstfeld to Flüelen with maneuvers)
- GPE_11 – Travel group return home (Flüelen – Gurtellen – Erstfeld depot)

FREE ROAM 4 Starting positions

- FSp_08 – Drive in the control car from Flüelen, track 1
- FSp_09 – Drive in locomotive Re4 / 4 I from Göschenen, track 1
- FSp_10 – Locomotive depot, train put together in Erstfeld
- FSp_11 – Re4 / 4 I-pendulum at the Urnersee
