

Hi there!

Thanx for your interest in my HKX repaint pack.

To use these repaints you need to have installed:

- HRQ's Taurus latest version  
(<http://trainsimcontents.blogspot.nl/>)
- Andi\_M/Paul S.'s Eurofirmawagen OBB  
(<http://www.railworks-austria.at/index.php/downloads/viewdownload/13/20>)
- Andi\_M/Paul S.'s Eurofirmawagen DB repaint  
(<http://rail-sim.de/railsimnew/index.php/downloadscat/summary/63-personenwaggons/960-eurofimawagen-deutsche-bahn> )

Thanx to HRQ for the Taurus and thanx to Andi\_M for the Amvz coaches.

---

The package contains 4 versions of the Taurus:

- Siemens ES64U2 HKX Dispolok 026

- Siemens ES64U2 HKX Dispolok 026 Weathered

- Siemens ES64U2 HKX Dispolok 036

- Siemens ES64U2 HKX Dispolok 036 Weathered

and 4 versions of the HKX Amvz coaches:

- Amvz HKX Aqua

- Amvz HKX Aqua Weathered

- Amvz HKX Beige

- Amvz HKX Beige Weathered

Also I have added a free roam scenario starting at Düsseldorf with all repaints. You need the Cologne-Düsseldorf route for this

Install:

**Although really nothing should go wrong; Make sure you have a backup of your Railworksdirectory just in case...**

After installing the .rwp package using the utilities.exe that is located in your railworks folder, go to the PMdesign directory

(..\railworks\Assets\PMdesign\HKX\_Pack). Then run the file : HKXTaurusInstall.bat

This will copy the original WLB Taurus .GeoPcDx files into the HKX folders.

You can also do this manually if you prefer.

---

This should complete the install. All repaints should be available to you.
